Civil Military Integration (Demand Level)

Civil Military Integration (Demand Level)

- **Civil Military Integration (CMI)**
  - Eliminates the distinction between doing business with the government and other buyers
  - The transition to Performance-Based Business Environment (maximizing the use of commercial practices) is a key step in achieving CMI
  - Single Process Initiative is the method DoD has chosen to implement CMI

Civil Military Integration

- Objective is to achieve integration of commercial and military facilities (and processes)
- Eliminates the distinction between doing business with the government and other buyers
- The transition to Performance-Based Business Environment (maximizing the use of commercial practices) is a key step in achieving CMI
- Single Process Initiative is the method DoD has chosen to implement CMI

*Letter from Dr. Gansler on SPI, 3 Jun 98

Civil Military Integration (Demand Level)

- **DCMC Engineering Role**
  - Be familiar with and review SPI submittals
  - Review and comment on SPI proposals
  - Be aware of the possibility for integration of civil and military production lines
  - Review the need for technical data and restrictive markings, as required
